

Alpha Data Announces Support for Xilinx Virtex-5

FOR IMMEDIATE RELEASE

San Jose, California May 15th 2006: Alpha Data today announced that the successful ADM-XRC series of PCI Mezzanine Cards is being extended to include platforms based on the exciting new Xilinx® Virtex-5™ family.

Alpha Data will support all members of Virtex-5 family with initial offerings based on LX.

Alpha Data Technical Director Keith Baker said, "Alpha Data's newest Virtex-5 products will offer our customers the high performance and flexibility they need as well as lower power consumption than previous generations. These products are ideal for prototyping, developing and embedding. Combined with the high-level support our engineering team offers to clients, application possibilities are tremendous."

The first product to be released in fall 2006 is based on the XC5VLX110 and features 333MHz DDR-II memory and PCI-X 133MHz. Supported form factors include PCI Express, PCI/PCI-X, CompactPCI, PMC and XMC. Flexible I/O via front panel adapters provide support for applications including:

- * Radar and Sonar Processing
- * Software Defined Radio (SDR)
- * Reconfigurable Computing
- * Telecommunication Encryption/Compression
- * Image Processing
- * Electronic Intelligence (ELINT)

"Xilinx and Alpha Data have a long history of partnering to bring leading edge FPGA platforms to market" commented Per Holmberg, Director of Worldwide Marketing at Xilinx, "We looking forward to continuing this partnership with the Virtex-5 FPGA family"

Availability: Alpha Data are initially offering the ADM-XRC-5/LX, featuring the LX110, with availability from August 2006. For further information sales@alpha-data.com (408)-916-5713.

About Xilinx: Xilinx is the worldwide leader in complete programmable logic solutions. For more information, visit www.xilinx.com

About Alpha Data: Established in 1993, Alpha Data is a leading provider of Xilinx based products for military and aerospace markets. Alpha Data is headquartered in the UK with sales offices in California.

As a strategic XPERT partner, Alpha Data has worked closely with Xilinx for many years and is regarded as a key source of first to market COTS products.

Alpha Data is a member of many standards organizations including PCI-SIG, VITA, PICMG and OCP-IP.
